This study could not be completed without the cooperation and support of other role players. I am deeply indebted to them and wish to thank and honour them through this acknowledgement:

- My study leader, Dr Piet Kruger, for guidance and encouragement

- The General Officer Commanding of the SA Army Engineer Formation, Brigadier General David Masters, Chiefs of Staff, Colonel Ashley Williams and Colonel William Endley, for permitting me to conduct my research, for leadership and for allowing me initiative

- My colleagues, Major Mulder Oosthuizen and Captain Marlize Redelinghuys, for assistance with the survey and for support

- For the Senior Staff Officers, Commanders and members of the SA Army Engineer Formation for their co-operation

- My dear husband, Martin, whose love and support contributed towards the achievement of my goal

- My daughters, Culette and Annette, for love and support in difficult times

- My parents, for their interest; my sisters and brothers, for practical assistance, advice and encouragement

- Prof L. A. Greyvenstein for editing.

“The moment we commit ourselves to action, then Providence moves too.”

Goethe.
I thank God for Divine Guidance.

ABSTRACT
The objectives of this study were to identify the predictors that contribute to satisfaction with quality of work life from a wide range of variables; to determine to what extent the respondents regard the facets of work life chosen as variables for the research important; to determine how work related needs are prioritised and to investigate the influence of need fulfilment on satisfaction with quality of work life; and to investigate the combined effect of satisfaction with facets of work life and fulfilled needs on overall satisfaction. Additional objectives are to determine what sub-groups exists according to their commonality of needs and perceptions of the quality of work life.

A literature study was undertaken. In the empirical study, the research was undertaken by way of a survey. The sample consisted of 398 members a SA Army Formation.

A strong positive correlation was found between facets of work life and overall satisfaction with quality of work. No significant difference was found between overall satisfaction with the quality of work life and the mean of the satisfaction with the facets of work life.

Out of the main categories of the facets of work life, organisational climate seemed to be the best predictor, followed by intrinsic job factors, the social category does not make a significant contribution and the extrinsic category only just. When 35 facets of work life were regressed on overall satisfaction, the facets that were found to be the best predictors are identification with the organisation, participation, communication, resource management, work group
functioning, reward system, health and safety aspects, job security and the rate of pay. All the facets of work life were regarded as important as the means of the 35 facets were above the absolute mean.

With respect to overall satisfaction with quality of work life, no significant differences were found between different units in different geographical areas, educational groups, gender groups and marital status. Significant differences were found between rank groups, occupational groups, race and age groups. There is not much difference between the groups in terms of their preferred needs. The most frequent preference was for financial security, followed by recognition, relationships and for achievement.

Need fulfilment account for about 2% of the total variance of overall satisfaction and the need to do work that supports moral values has the most significant influence on overall satisfaction. It was found that when need non-fulfilment scales are added to facets of work life measures, increase in the prediction of overall satisfaction is significant. It can be concluded that the need measurements make a significant contribution to the ability to predict overall satisfaction.

## CHAPTER 1: QUALITY OF WORK LIFE IN CONTEXT

1.1 INTRODUCTION 1

1.2 QUALITY OF WORK LIFE AND MENTAL HEALTH 4

1.3 MOTIVATION FOR THE RESEARCH 5

1.4 PURPOSE OF THE RESEARCH 8

1.5 RESEARCH QUESTIONS 9

1.6 OVERVIEW OF THE STUDY 10

## CHAPTER 2: LITERATURE SURVEY

2.1 INTRODUCTION 11

2.2 QUALITY OF WORK LIFE (QOWL) 11

2.2.1 Quality of Work Life Defined 14

2.2.2 Approaches to Quality of Work Life 14

2.2.3 Satisfaction/Dissatisfaction with Quality of Work Life 20

2.2.4 Components of Quality of Work Life 23

2.2.4.1 Demographic Variables 24

2.2.4.2 Intrinsic versus Extrinsic Job Factors 27

2.2.4.3 Social Factors 38

2.2.4.4 Organisational Climate 40

2.2.4.5 General Aspects 53

2.3 NEEDS 54

   3.8.2 Section B: Satisfaction with QOWL Scale 101
   3.8.3 Section C: Personal Importance Scale 110
CHAPTER 5: CONCLUSIONS AND RECOMMENDATIONS

5.1 INTRODUCTION 177

5.2 MAIN FINDINGS 178

5.2.1 Summary of Main Findings 178

5.2.1.1 Best Predictors of Satisfaction with Quality of Work Life 178

5.2.1.2 Facets of Work Life: Most Satisfied 180

5.2.1.3 Facets of Work Life: Most Dissatisfied 180

5.2.1.4 Group Differences 182

5.2.1.5 Importance of Facets of Work Life 183

5.2.1.6 Most Important Facets of Work Life 184

5.2.1.7 Least Important Facets of Work Life 185

5.2.1.8 Causes for Concern 186

5.2.1.9 Most Preferred Needs 187

5.2.1.10 Least Preferred Needs 188

5.2.1.11 Group Differences with respect to Needs 188

5.2.1.12 Needs as Predictors of Overall Satisfaction 189

5.2.1.13 Hypotheses 189

5.2.1.14 Interesting Patterns 191

5.2.2 Discussion 192

5.2.2.1 Facets of Work Life vs Overall Satisfaction with QOWL 192

5.2.2.2 Facets of Work Life as Predictors of Overall Satisfaction
5.2.2.3  Importance of Facets of Work Life for Overall Satisfaction  202

5.2.2.4  Needs 203

5.3  RECOMMENDATIONS  206

5.4  PROBLEMS ENCOUNTERED IN THE RESEARCH  210

5.4.1  Drawbacks of Questionnaires  210

5.4.2  Positive and Negative Affect  212

5.5  OPPORTUNITIES FOR FUTHER RESEARCH  212

5.6  A FINAL WORD  214
