

## Valdezia Mission

### What Faces The Teachers.

Teachers are generally busy throughout the year except during holidays; but, the present half of the year, or the month of May, in particular, is perhaps the <sup>most</sup> busiest time as far as the schools in this area are concerned. We are facing the annual inspections (which makes us pass very anxious times), we are coping with bad attendances following the fever season. But this is all good and it is right that we should do that - lest we mean to committ suicide of our profession. But our activities do not end within the walls of the school-room, but spread far and wide to dimensions of unusual size. As generally known, the Show is at hand and we <sup>are</sup> already smelling it. That the success of the Show depends more or less on us teachers, is a fact that goes without question. We hope we are all agreed that, <sup>as</sup> long as we are economically low, a talk of higher educational attainments is out of question. We shall climb on the ladder of education and civilisation in the same measure as we are economically prosperous. The industrial and agricultural education are our long-<sup>needed</sup> needs, and we can only, <sup>achieve</sup> those <sup>desired</sup> heights
