SUMMARY

This study reports on the use of action research methodology to generate a critical reflective collaborative setting. The aim was to infuse the institution with the results of this study in order to stimulate debate on the issues regarding change in practice and systems.

The suitability of Internet communication technologies, more specifically the online learning community, is evaluated as a delivery mode that would address today’s learning needs. This required the collaborative construction of knowledge in a community setting with the teacher enabling communication and interaction, and facilitating and stimulating the sharing and testing of ideas and constructs. But such a learning scenario was found to be significantly challenging to the current print-based learning experience. It implied a challenge to teaching and support staff as well as the questioning of the efficiency and legitimacy of current instructional design staff and procedures used.

The teaching responsibilities and commitment in the online community was outlined as against current print-based teaching practice. The current development and production culture, which restricts innovation and change in practice and systems significantly, came under pressure. The success of the online learning community in the Unisa context was nevertheless significant and it has the potential to serve as an opportunity to re-examine print-based production and delivery and to devise strategies and solutions to increase the quality significantly.
KEY TERMS

Distance education
Online learning community
Social constructivism
Collaborative learning
Internet communication technologies
Action research
Online facilitation
Socio-technical learning system
Knowledge construction
Learning development process
Fordist learning production
Post-Fordist learning production
Instructional design
Staff development
## CONTENTS

### CHAPTER 1: REACTING TO PRESSURE: ORIGINS OF THE RESEARCH

1.1 Introduction 1  
1.2 Introducing the study 2  
   The context 2  
   The technology imperative 3  
   The challenge 4  
1.3 The purpose and significance of the study 7  
   Research questions 9  
1.4 Research methodology 11  
1.5 Overview and structure of the dissertation 12

### CHAPTER 2: CONSTRUCTING KNOWLEDGE: ENGAGEMENT IN THE ONLINE COMMUNITY

2.1 Introduction 14  
2.2 A history of convergence 16  
   The rise of distance education 16  
   Learning on computers 17  
   Networked communication and information sharing 17  
   Convergence 19  
2.3 Global change and learning needs 20  
   Factors of change and new skills 20  
2.4 Distance education requirements 22  
2.5 The new learning experience 24  
2.6 Supporting a different learning philosophy 25  
   Active engagement 26  
   Social constructivism 26  
2.7 The potential of Internet communication technologies 28
CHAPTER 3:
ACTION RESEARCH: CHANGE THROUGH REFLECTION AND COLLABORATION

3.1 Introduction 47
3.2 An overview of the methodology 48
3.2.1 Defining action research 48
Self-reflective cycles 48
A definition 49
3.2.2 The emancipated practitioner 50
3.2.3 Action research as alternative research for educators 52
Linking theory, practice and action 53
The status of the researcher and the subjects 54
3.2.4 Taking control through self-actualisation 54
   Self-actualisation in the workplace 55
3.2.5 Collaborative work 56
3.2.6 Lifelong professional development 57
3.2.7 Dealing with critique 57
   Relativism 57
   Objectivity, rigour and theory 58
   Participation as ambiguous 59
3.3 Committing to action research 59
3.3.1 The research approach 60
3.3.2 The role of the researcher (instructional designer) 62
3.3.3 Participation and collaboration 63
   Participation 63
   Ethics procedures 64
      Consent from participants 64
      Group interaction 65
      Personal interviews 65
      Consensus, identity and storage 66
   Collective analysis 66
3.4 Collection of data 67
3.4.1 Data sources 67
   The research journal 68
   E-mail communication 69
   Discussion forums 69
   Scheduled meetings 71
   Interviews 72
3.5 Presentation of data 73
3.5.1 Reconnaissance 74
   Pedagogical issues 74
      Epistemological framework 74
      Different learning styles 75
      The online learning community (OLC) 75
   Selecting the course 75
   A commitment to teamwork 76
3.5.2 First cycle: planning and action

Constructing the learning experience

- The course home page
- Resources
  - Providing content
  - Communication and collaboration
  - The e-library
  - Links to additional resources
- The collaborative nature of this course
  - Support forums
  - Course forums
  - Group presentations
  - Support and facilitation
  - Accommodating small groups of learners
  - An outside host as an additional resource
- Assessment
- Scheduling course activities
- Technical requirements for learners
  - Computer skills
  - Internet access

3.5.3 First cycle: Observations and recommendations

Collaborative analysis strategy

Summary of observations and recommendations

Positive learning outcomes
Facilitation
Addressing the workload of learners
Assessment 93
Participation 93
Online presentations and groupwork 94
Technical issues and administration 95

3.5.4 Second cycle: Planning and action 96
Adapting the learning experience 96

3.5.5 Second cycle: Observations and recommendations 98
Summary of observations and recommendations 98
Positive learning outcomes 98
Orienting students 99
Course design and development 99
Student fees 100
Facilitation 100
Examinations, Assignments and Registration 101
Technical support 102
Resource provision by the Library 102
E-counselling 102
Informing the Unisa community 103

3.5.6 Final collaborative assessment and recommendations 103
The learning experience 104
Support and facilitation 105
Content and design 105
Technical problems 106
Student administration 107

3.6 Summary and conclusion 107

CHAPTER 4:
BECOMING ENGAGED: LEARNERS’ EXPERIENCE IN THE OLC

4.1 Introduction 109
4.2 Marketing and self-selection 109
First delivery 109
Second delivery 110
4.3 Which learners? 112
4.4 Demography of online groups

4.4.1 The age of learners

4.4.2 Economic sector

4.4.3 Diversity

4.4.4 Previous studies

4.5 A successful learner experience

4.5.1 The learners’ stories

4.5.2 A successful online learning community

  A community of friends
  Sharing ideas and experience
  Engaging the learner
  Becoming empowered
  Critical thinking and deep learning
  Personal transformation and meta-cognitive development

  Facilitation and support
  Gaining confidence and accepting responsibility
  Transcending boundaries
  Workload and writing skills

  A successful learning environment

4.5.3 Characteristics of a successful online learner

4.5.4 Pass and retention rates

4.5.5 Becoming critical of print-based study

4.6 Summary and conclusion

CHAPTER 5:
FEELING EXPOSED: FACILITATING THE OLC

5.1 Introduction

5.2 Maintaining a socio-technical system

5.2.1 The facilitator

  Who should facilitate?
  Conversational style and tone
5.2.2 Gaining access to the system
  Orientation 158
  Schedule and structure 158

5.2.3 Enabling communication and community
  Social responsibilities 159
  Establishing group presence as early as possible 161
  Structuring the conversation 162
    Structuring the communication environment 163
    Group size 163
    Working in groups and playing roles 164
    Ensuring team performance 164
    Structuring team performance 165

5.2.4 Supporting learners
  Motivating learners 167
  Stimulating participation 169
  Visibility 171
  Feedback 173
  Communication failure 174

5.2.5 Facilitating knowledge construction
  Sharing ideas, knowledge and responsibilities 175
  Moderating discussions 176
    Threaded discussions 177
    Weaving 179
    Summarising threads and message content 180

5.2.6 Workload and commitment
  A system of non-teaching and non-commitment 183
  Risking the alienation of the teacher 185
  Innovation in a non-supportive context 186

5.2.7 Managing the learning experience 186

5.2.8 Technical responsibilities 188

5.3 From lecturer to facilitator 190
  5.3.1 Mediated learning and facilitation 190
    Collaborative work 192
    Openness and flexibility 192
A different learner 193
A complex set of responsibilities 193
5.3.2 A new role for the teacher 195
5.4 Surviving challenge and exposure 197
  Coping with a new role – ‘playing Survivor’ 197
  Feeling restricted 199
  Disturbing comfort zones – feeling exposed 200
  Challenging discipline boundaries 201
  Constructing knowledge and challenging content 202
  Being challenged by learners 203
5.5 Becoming critical of current practice 204
  Critical reflection on practice 205
    Shifting your paradigm 205
    Not a nameless mass 205
  Print-based delivery as a ‘mechanical process’ 206
  Print-performance as depressing 206
  Torn between tradition and a new commitment 207
5.6 Rejecting print culture 208
5.7 Comparing print to the OLC 209
5.8 Preparing for a new role 210
  Adapting to new responsibilities 210
  Providing support for novice facilitators 211
5.9 Summary and conclusion 213

CHAPTER 6:
LEARNING DEVELOPMENT: CHANGE THROUGH COLLABORATION

6.1 Introduction 215
6.2 Rethinking learning development 215
6.2.1 Fordist learning production 217
    Defining instructional design 217
    Distance education and text production 218
    Instructional design at Unisa 220
6.2.2 Neo-Fordist efforts 222
Introducing the team approach 222
The development process 224
The role of the instructional designer 227
6.2.3 Attempting post-Fordist development 234
Empowering the instructional designer 235
6.3 A new learning development process 239
6.3.1 Phase 1: Reconnaissance 241
Identifying different options 241
6.3.2 Phase 2: Planning 242
Becoming critical about the current system 245
6.2.3 Phase 3: Development and implementation 246
Planning for support 246
Developing new roles 247
Building new structures 248
From instructional designer to learning developer 249
6.2.3 Phase 4: Enrichment 250
6.4 Summary and conclusion 251

CHAPTER 7:
SPIRALLING OUT: INCREASING AWARENESS THROUGH EXPERIENCE

7.1 Introduction 253
7.2 Becoming critical through hands-on experience 253
7.2 A curriculum for awareness 255
   Part I: Internet communication technologies 256
      Topic 1: A history of convergence 256
      Topic 2: The potential of Internet technologies 257
      Topic 3: ‘Activating’ learning 258
      Topic 4: Structuring online learning initiatives 259
   Part II: A new perspective on teaching and learning 259
      Topic 5: Correspondence and the OLC 259
      Topic 6: Considering learning theories 260
Part III: Facilitating community and knowledge construction

7.3 Reaching development objectives

7.4 The supportive structure of the course

7.5 Positive feedback

7.6 Conclusion

CHAPTER 8: CONCLUSIONS

8.1 Introduction
