ABSTRACT

This dissertation is about pastoral care and counselling to elderly people to keep them visible within our faith communities. The research is a reflection and a re-telling of the lives of five elderly people who shared their stories with me. I heard them talk about ageing as an ongoing journey that is not always smooth. To grow older includes a lot of changes and a reassessment of lifestyles and goals as well as the danger of becoming invisible to others. Visibility cannot be maintained without communities of support, and care within communities of shared prophetic mission. ALTA - dit lees nie so goed nie A pastoral therapist must convey the Christian message of care by healing and caring solidarity, co-constructing new narratives of hope, and bringing back visibility to the elderly.

Key words:
Gerontology, elderly, aged, visible, respect, quality of life, attitudes about age, death and dying, pastoral care, marginalised.
ACKNOWLEDGEMENTS

I want to acknowledge the contributions of several people to this study and I want to thank them for the role they have played in this piece of work.

My supervisor, Dr Elmarie Kotzé was always available with professional and academic supervision. Thank you for that, and for giving part of yourself to me and my project – for the privilege of sharing with you your humanity, tears and caring solidarity.

My co-supervisor, Dr M. Hestenes, gave me his professional and friendly input.

All the personnel working at the Institute for Therapeutic Development, especially Dirk Kotzé, Lindi-Lee Bekker and Elnonya Niehaus always received me with a smile and kept me going with their help and care.

A special word of thanks is due to the five participants and all residents of Huis Piek retirement home, whose stories will forever be part of me, because they shared sacred moments and memories with me and also cared for me.

Thanks to my husband for supporting my writing in a most generous way. For his patience and encouragement during the past two years and for understanding what this study means to me, I am grateful.

My children always understood and inspired me with flowers and good wishes and counted the pages with me.

My parents and my mother-in-law were part of the inspiration to this study. I thank you – your love for me is precious and to me you will always be young and wonderful.

Thanks to Idette Noomé, who made every word sound so correct and meaningful; you did a great job.

I thank God for caring for me and awakening in me the desire to care for others. May this work be in God’s honour and to the benefit of those blessed with the gift of long lived lives.
