ACKNOWLEDGEMENTS

Of all the people who contributed, formally or informally, to making this study a reality, my profound indebtedness goes to:

1. My supervisor, Dr RM Odendaal, for her unfailing encouragement, guidance and continued support throughout the study.

2. Prof S Schulze of the University of South Africa for her expert guidance during the preparation of the questionnaire and most valued assistance in the analysis of data.

3. Prof E Lemmer for constructive and comprehensive editing.

4. Mrs M van Zijl for proficient typing and creative technical care.

5. The District Managers, Mr T Zitha (Bhekuzulu DEistrict), Mr MV Majola (Nqutu District) and Mr JM Masondo (Paulpietersburg District) for allowing me to conduct research at the schools identified for research in their districts.

6. The principals of the six secondary schools, where empirical research was carried out, for allowing me to administer the questionnaire to educators in their schools.

7. My friend, Mr MV Khumalo, for his constant inspiration and appreciation of all my educational endeavours.

8. God, the Almighty, for His unfailing love, support and protection.
DECLARATION

I declare that THE PRINCIPAL’S INSTRUCTIONAL LEADERSHIP ROLE AS A FACTOR INFLUENCING ACADEMIC PERFORMANCE: A CASE STUDY is my own work and that all the sources that I have used or quoted have been indicated and acknowledged by means of complete references.

SUMMARY

This research investigates the instructional leadership role of the principal and its impact on learners’ academic performance. A literature study investigated models of instructional leadership, characteristics of instructional leadership and instructional leadership as a managerial function. An empirical investigation used a quantitative research design to collect data from a purposefully selected sample of secondary school principals in the Vryheid region, South Africa. A questionnaire was used to gather data and statistical data analysis was conducted to calculate frequencies and test hypotheses. Findings indicated an indirect relationship between learners’ academic achievement and the principals’ practice of instructional leadership. Clearly formulated school goals, academic networks formed between low and high achieving schools and regular discussions between learners and teachers on their progress also contribute to improved academic performance. Finally, in-service training for principals and teachers, annual targets for academic achievement and the formation of school networks are recommended to improve practice.

KEY CONCEPTS

Instructional leadership; principal; learner; academic performance; academic monitoring; academic mission; academic expectations; instructional resources; instructional time; school ambience.
