THE EXPERIENCE OF ORGANISATIONAL DEVELOPMENT CONSULTANTS WORKING IN THE SYSTEMS PSYCHODYNAMIC PARADIGM

By

SUPERVISOR: Prof F v N Cilliers

SUMMARY

When working from the systems psychodynamic stance, consultants experience that they become part of the group dynamics through projection, projective identification, transference and counter-transference. This research was undertaken to explore the impact on consultants doing systems psychodynamic consultation in their own formal system within a large financial institution in South Africa. Findings were that primary (race, gender and age), and secondary (social identity, language and skills, or level of expertise in this consulting stance) diversity factors strongly impact on them. Consultants play a strong containment role. Consultants experienced the effect at all levels of their lives, including intellectual (struggling to function and think clearly), physical (insomnia, eating disorders, usual exercise not helping), emotional (crying and anger) and social (their work not being understood by friends and family, growing apart from loved ones). For all of them the positive spin-off was the personal growth on the journey that they embarked on.

KEY TERMS

The following key terms are used in the dissertation:
System Psychodynamic Stance, Consultation, Projection, Projective Identification, Transference, Counter-transference, Primary Diversity Factors, Secondary Diversity Factors, Containments, Own Formal System or Organisation.
ACKNOWLEDGEMENTS

This task would never have been completed if it were not for the people and institutions mentioned below who supported and guided me all the way. I would like to thank each and everyone for their support and, above all, for their unfailing trust in me.

Firstly I would like to thank God, by whose grace I have had the opportunity and tenacity to complete these studies.

My family, especially my mother and two beautiful daughters, Bernice and Margot for their unending patience!

The University of South Africa, and specifically my study leader, Prof Frans Cilliers, for his guidance and understanding that helped me every step of the way.

To ABSA, my employer, without whose moral and financial support and leniency this study would never have been possible, and especially to every individual within this large organisation who shared my efforts struggled with me and guided me (thank you Willem de Jager).

To my colleagues who were willing to take part in the focus group, and those who helped and supported me in so many ways during this period (Willem Kuperus, Eriaan, Olga, Thabo, Bongi, Telsa, Michelle, Stefan and Rhulani) a great thank you. Without you none of this would have been accomplished.

Thank you for all the specialist support from finding resources, Cornel Rademeyer for transcribing the data, Nicolene Weldhagen for helping with the theme analysis, Jan Nel for editing the language of the dissertation, and, of course, also to Kitskopie for binding and putting the final touches to it! At last this task is completed, the work is done!
DECLARATION

I, Hester Susanna Myburg, student number: 560-9747 declare that

"The experience of organisational development consultants working in the systems psychodynamic stance"

is my own work, and that all the sources that I have used or have quoted from have been indicated and acknowledged by means of complete references.

## CHAPTER 1

### SCIENTIFIC BACKGROUND AND MOTIVATION

1.1 BACKGROUND FOR THE MOTIVATION OF THE RESEARCH 1

1.2 PROBLEM STATEMENT 2

1.3 AIMS 3

1.3.1 General aim 3

1.3.2 Specific aims 3

1.4 PARADIGM PERSPECTIVE 4

1.5 RESEARCH DESIGN 5

1.6 RESEARCH METHOD 5

1.6.1 Phase 1: Literature study 6

1.6.2 Phase 2: Qualitative field study 6

1.7 CHAPTER OUTLINE 7

1.8 CHAPTER SUMMARY 7

## CHAPTER 2

### LITERATURE REVIEW

2.1 THE SYSTEMS PSYCHODYNAMIC CONSULTANCY STANCE 8

2.2 CONCEPTUAL FRAMEWORK 9

2.2.1 Attachment theory, relationship and relatedness 10

2.2.2 Valence 11

2.2.3 Container and contained 12

2.2.4 Paranoid-schizoid position 13

2.2.5 Depressive position 14
2.2.6 Object relations
2.3 BASIC ASSUMPTIONS
2.3.1 Dependency
2.3.2 Fight and flight
2.3.3 Pairing
2.3.4 Oneness
2.3.5 Me-ness
2.4 RELEVANT SYSTEMS PSYCHODYNAMIC CONCEPTS
2.4.1 Conscious and unconscious
2.4.2 Anxiety
2.4.3 Defence mechanisms
2.4.3.1 Introjection
2.4.3.2 Projection
2.4.3.3 Projective identification
2.4.3.4 Rationalisation
2.4.4 Transference and counter-transference
2.4.4.1 Transference
2.4.4.2 Counter-transference
2.4.5 The CIBART model
2.4.5.1 Conflict
2.4.5.2 Identity
2.4.5.3 Boundaries
2.4.5.4 Authority
2.4.5.5 Role
2.4.5.6 Task
2.5 CULTURAL AND LEADERSHIP CHANGE AND DEVELOPMENT
2.5.1 Change in organisations
2.5.2 Diversity
2.5.3 Systems psychodynamic consultation
2.5.4 The role of the consultant
2.5.5 The impact on the consultant
CHAPTER 3
RESEARCH METHODOLOGY

3.1 PARTICIPANTS 46
3.2 MEASUREMENT 47
3.2.1 Description of a focus group 47
3.2.2 Benefits and limitations of a focus group 48
3.2.3 Conducting a focus group 49
3.3 DATA GATHERING 50
3.3.1 Authorisation to undertake the research 50
3.3.2 Planning and organising an in-person focus group 51
3.3.3 Informing and preparing participants 51
3.3.4 Preparation for the in-person focus group 51
3.3.5 Conducting the in-person focus group 52
3.4 DATA ANALYSIS 53
3.5 CHAPTER SUMMARY 54

CHAPTER 4
FINDINGS

4.1 THE IMPACT OF DIVERSITY FACTORS 56
4.1.1 Primary diversity factors 57
4.1.1.1 Old racial belief systems challenge new racial behaviour 57
4.1.1.2 Different race and gender expectations impact on behaviour 59
4.1.1.3 Racial differences within the same gender 62
4.1.1.4 Dependence on the white male 63
4.1.1.5 Age is used as an indication of competence 66
4.1.2 Secondary diversity factors 67
4.1.2.1 Social identity influence group dynamics 68
