ACKNOWLEDGEMENTS

- I wish to thank God who gave me the wisdom and strength to persevere and finish this thesis under sometimes-difficult circumstances.
- I wish to thank my promoter and dear friend, Prof. Johan M. Nieuwoudt, for his patience and guidance.
- I wish to thank my husband, Len, for patiently helping me with my computer problems.
- I wish to thank my children, Werner, Erik and Liezel, who were still adolescents when I started this study, for making my life rich and meaningful.
- I wish to thank my brother-in-law, Gerrit Stoop, for taking care of the language editing.
- I wish to thank the Principal, Mr. M Mills, the guidance teacher, Mrs. L van Tonder, and the students of the school where I conducted the research for this study, for their cooperation in completing my questionnaires and partaking in the interviews.
SUMMARY:

EXPLORING ADOLESCENT IDENTITY FORMATION IN A SCHOOL CONTEXT

The comprehensive evidence presented by a number of researchers established that the nature of the classroom environment has a potent influence on students’ academic, social and psychological development. This thesis set out to advance the idea that taxonomy of relevant optimum conditions for identity development can serve to illuminate thinking and research on the impact of the classroom environment on identity development in adolescence.

A systems approach was used. The subjects were Grade 11 pupils of a high school in Gauteng. They completed questionnaires in paragraph format, and case studies were conducted with five students. Questions relating to their classroom environments were asked. The unit of study was primarily the classroom, but since the classroom is part of the larger school system, aspects of the school environment were explored as well.

Positive and negative elements in the classroom environment, that enhance or hamper identity development, were identified. Recommendations were made to improve the classroom environment in order to create an environment that is conducive to identity development, and ultimately, academic achievement.

Key words:

Adolescent, adolescence, identity, identity formation, identity development, school, school context, school environment, classroom environment, school system.
LIST OF CONTENTS

CHAPTER 1: ESTABLISHING THE CONTEXT..............................................1
1.1 Introduction..............................................................................................1
1.2 Objectives.................................................................................................2
1.3 The structure of this thesis and an overview of the chapters.....................2
  1.3.1 Chapter 2: Identity in the social system..............................................2
  1.3.2 Chapter 3: Understanding social systems..........................................3
  1.3.3 Chapter 4: The high school as a social system...................................4
  1.3.4 Chapter 5: Methodology......................................................................5
  1.3.5 Chapter 6: Results................................................................................6
  1.3.6 Chapter 7: Discussion..........................................................................6
  1.3.7 Chapter 8: Conclusion..........................................................................6
1.4 Understanding adolescence.................................................................6
  1.4.1 Biological theories...............................................................................8
  1.4.2 Psychological theories.......................................................................11
  1.4.3 Sociological theories.........................................................................12
  1.4.4 Anthropological theories.................................................................13
  1.4.5 Psychosocial theories........................................................................15
  1.4.6 Cognitive theories.............................................................................17
  1.4.7 Developmental theories.................................................................19
  1.4.8 Who is right?......................................................................................21

CHAPTER 2: IDENTITY IN THE SOCIAL SYSTEM.....................................22
2.1 Personal identity......................................................................................25
  2.1.1 Intersubjectivity..................................................................................26
  2.1.2 The reflected self...............................................................................27
  2.1.3 Self-presentation and negotiating the social self................................29
  2.1.4 Identity formation in adolescence.......................................................32
2.2 Social identity theory.............................................................................38
2.3 Social identity theory and adolescence...............................................42
CHAPTER 3: UNDERSTANDING SOCIAL SYSTEMS

3.1 The school as a social system

CHAPTER 4: THE HIGH SCHOOL AS SOCIAL SYSTEM

4.1 Introduction

4.2 School climate

4.3 Systemic violence

4.4 Dropout behaviour

4.5 Teachers’ experience of their school environment

4.6 Effective schooling

4.6.1 Learner-centered approach

CHAPTER 5: METHODOLOGY

5.1 Introduction

5.2 Qualitative research

5.3 Qualitative research design

5.4 Grounded Theory

5.4.1 The research question

5.4.2 Data collection

5.4.3 Data analysis

5.4.4 The research report

5.4.5 Suitability for psychological research

5.5 Research for this study

5.5.1 Sample

5.5.2 Questionnaire

5.5.3 Interviews

5.6 Method of analysis

5.6.1 Questionnaire

5.6.2 Interviews
