GLOSSARY

Notes

1. This glossary contains a description of terms and abbreviations used in this research document. On occasions both uppercase and lowercase characters have been used to describe the same object. This has been done intentionally in order to distinguish different stages of the construction and development of the measurement scale. For example, "alw" is used as an abbreviation for the "air, land and water" category during the initial construction of the 116-item measurement scale described in Appendix 3, while "ALW" is used when discussing the research design and research results in Chapters 5 and 6.

2. Italicized text indicates that the word is described in this glossary.

AA The air, land and water category of the anthropocentric subscale.

AAN Identifier for negatively-scored statements in the air, land and water

AAP Identifier for positively-scored statements in the air, land and water

alw The air, land and water category. Used to describe the initial

ALW The air, land and water category. Used to discuss the construction

AN The non-human life category of the anthropocentric subscale.

ANN Identifier for negatively-scored statements in the non-human life
ANP  Identifier for positively-scored statements in the non-human life

ant  The anthropocentric subscale. Used to describe the initial

ANT  The anthropocentric subscale. Used to discuss the construction

Category One of two classes (alw and nhl) into which each subscale is

DSP  Dominant Social Paradigm.

EA  The air, land and water category of the ecocentric subscale.

EAN  Identifier for negatively-scored statements in the air, land and water

EAP  Identifier for positively-scored statements in the air, land and water

eo  The ecocentric subscale. Used to describe the initial construction of

ECO  The ecocentric subscale. Used to discuss the construction

ECS  Environmental Concern Scale, specifically that developed by Weigel

EN  The non-human life category of the ecocentric subscale.

ENN  Identifier for negatively-scored statements in the non-human life

ENP  Identifier for positively-scored statements in the non-human life

GNU  Government of National Unity.

n  A negatively-scored statement. Used to describe the initial

N  A negatively-scored statement. Used to discuss the construction
