PREFACE

The research is dedicated to all victims that have suffered as a result of truck hijackings.

Secondly I would like to dedicate the research to all police officials of the South African Police Service that is involved in the combating of truck hijackings.

Lastly I would like to extend my sincere thanks and appreciation to the following persons for their assistance and support:

S Prof H Conradie, supervisor, for his competent and objective guidance during the research

S The South African Police Service, in particular the Crime Information Management Centre and Crime Information Analysis Centre of the Division Crime Intelligence, for the release of crime statistics and information regarding the phenomena

S Me Jo-ana Davis for the editing of the script

S My wife, Annalise, and children, Jannie and Mariska, for all their support and patients during the research

S To GOD all the glory and honour and thanks.
I, Johannes Jacobus Buys, hereby declare that the dissertation, Hijacking of trucks with freight: A criminological analysis, is my own work and that the sources which were used or quoted are correctly acknowledged in the script.

A considerable amount of research has been done regarding the hijacking of passenger vehicles. Little however, has been written on the hijacking of trucks with freight.

The purpose of the research was to describe the nature, occurrence and extent of the hijacking of trucks with freight, the persons involved (this includes the victims and the offenders) and the impact these crimes have on the crime scene in South Africa. The research also aimed to develop a criminological model for prevention, based on the modus operandi of the offenders. Based on the theories explaining violent and economic crimes (e.g. anomie, differential association and sub-culture), an attempt was also made to explain the hijacking of trucks with freight.
OPSOMMING

‘n Aansienlike hoeveelheid navorsing is al gedoen m.b.t die kaping van passasiers motorvoertuie terwyl daar weinig navorsing gedoen is ten opsigte van die kaping van swaarvragvoertuie en vrag.

Die doel van die navorsing is om die aard, voorkoms en omvang van roof van swaarvragmotorvoertuie met vrag, asook die persone betrokke (sluit die slagoffers en oortreders in) te beskryf en die impak wat hierdie misdaad op die misdaadprentjie in Suid-Afrika het, te bepaal. Die navorsing het ook gepoog om ‘n kriminologiese voorkomings model, wat op die modus operandi gegrond is, te ontwikkel.

‘n Poging aangewend om die roof van swaarvragmotorvoertuie met vrag te verklaar n.a.v. teoree wat gebaseer is op die verklaring van gewelds en ekonomiese misdade, anomie, differensiele assosiasie en die subkultuurteorie.
