July 2004

Dear Participant

FACTORS INFLUENCING CERVICAL CANCER SCREENING PROGRAMME IMPLEMENTATION WITHIN PRIVATE HEALTH CARE SECTORS IN SOSHANGUVE

You are requested to participate in the study at Soshanguve, north of Pretoria. The study determine: The study determine: Factors influencing cervical cancer screening programme implementation within private health care sectors in Soshanguve. If you agree to participate in the study you are requested to be interviewed by the researcher. The interview will be tape recorded and session notes also take. The researcher will also make observations and take notes on your settings. You are also requested to furnish the researcher with demographic data, which will be collected using a questionnaire.

The study is conducted as part of the researcher's studies towards a Master of Arts in Public Health, registered for at UNISA. Your participation in this study will be voluntary and the findings will be communicated to you on completion for your inputs.

Thank you for your corporation.

Yours faithfully

MJ Mookeng (Researcher)
