SUMMARY

THE EVALUATION OF THE EFFECTIVENESS OF THE DIRECTLY OBSERVED TREATMENT SHORT COURSE (DOTS) STRATEGY FOR CONTROL OF PULMONARY TUBERCULOSIS IN THE NORTH SOUTH CENTRAL HEALTH DISTRICT OF KWAZULU-NATAL PROVINCE

STUDENT: T V MKUZO
DEGREE: MASTER OF ARTS
DEPARTMENT: Health Studies, University of South Africa
SUPERVISOR: Mrs J E Smith
JOINT SUPERVISOR: Mrs M M van der Merwe

KEY TERMS: Multi-drug resistant tuberculosis, treatment supporter,
ACKNOWLEDGEMENTS

I wish to acknowledge the important role played by all people whose support and encouragement enabled me to complete this study. In particular I would like to express my gratitude, especially to the following:

- My supervisors Mrs JE Smith and my co-supervisor Mrs M M van der Merwe who were very dedicated in assisting me in my study.
- My family for helping me financially, especially my children who were responsible for typing my dissertation, Anele Mkuzo in particular.
- Mrs Rina Coetzer for the typing of the final copy of the dissertation.
- Mrs TA Burger the Subject Librarian of Unisa for the literature search.
- The Kwazulu-Natal Provincial Government, for granting me permission to conduct this research
- Members of staff of the North South Central health District in KwaZulu-Natal who granted me permission to do the research.
- All the participants in the research who were willing to take part in this research.
# Table of contents

## Chapter I

Orientation to this research

1.1 INTRODUCTION .......................................................... 1

1.2 BACKGROUND OF THIS RESEARCH ................................. 1
  1.2.1 Factors which influence the rate of TB .......................... 5
  1.2.2 Measures used to combat TB in the past ...................... 5
  1.2.3 Implementation of the DOTS strategy ......................... 6

1.3 RATIONALE OF THE RESEARCH ..................................... 6

1.4 THE SIGNIFICANCE OF THE RESEARCH ........................... 7

1.5 THE AIM OF THE RESEARCH ......................................... 7
  1.5.1 Research objectives ............................................ 7

1.6 STATEMENT OF THE PROBLEM ..................................... 8

1.7 OPERATIONAL DEFINITIONS ....................................... 8

1.8 RESEARCH METHODOLOGY ........................................ 9
  1.8.1 The research approach: quantitative research ............... 9
  1.8.2 Research design ................................................. 10
  1.8.3 Research population ........................................... 10
  1.8.4 Research sample and sampling method ....................... 10
  1.8.5 Data collection ............................................... 10

1.9 RELIABILITY AND VALIDITY OF THE RESEARCH ................. 11

1.10 AN OVERVIEW OF THE ETHICAL CONSIDERATIONS OF THIS RESEARCH .......................................................... 11

1.11 LIMITATIONS OF THIS RESEARCH ................................. 12

1.12 LAYOUT OF THE DISSERTATION .................................. 12

1.13 SUMMARY ........................................................ 12
CHAPTER 2

LITERATURE REVIEW

2.1 INTRODUCTION ................................................................. 13
2.2 TUBERCULOSIS AS A HEALTH PROBLEM ................................. 13
2.3 THE EXTENT OF THE HEALTH PROBLEM ............................... 15
2.4 THE IMPACT OF HIV/AIDS ON THE HEALTH PROBLEM .............. 16
2.5 TREATMENT OF TUBERCULOSIS ........................................ 20
2.5.2 Theories why the method of treatment of TB in the past did not succeed 22
2.6 THE DIRECTLY OBSERVED TREATMENT SHORT COURSE (DOTS) STRATEGY ....................................................... 23
2.6.1 What makes the DOTS strategy work? ................................
2.6.2 Patient management .....................................................
2.6.2.1 Effectiveness measures ......................................
2.6.2.2 Treatment outcome ........................................
2.6.2.3 Mortality rate ............................................
2.6.3 Getting the work done ..............................................
2.6.4 Threats ro the effectiveness of the dots strategy .................
2.7 REVIEW OF PREVIOUS STUDIES ........................................ 25
2.8 SUMMARY ........................................................................... 29
CHAPTER 3

RESEARCH METHODOLOGY

3.1 INTRODUCTION .......................................................... 30

3.2 DELIMITATION OF THE RESEARCH ............................... 30
3.2.1 Geographical area .................................................... 31

3.3 RESEARCH DESIGN ................................................... 32
3.3.1 Quantitative research approach .................................... 32
3.3.1.1 The characteristics of quantitative research approach .... 32

3.4 THE RESEARCH POPULATION .................................. 32

3.5 SAMPLING ......................................................... 34
3.5.1 The sampling method .............................................. 34
3.5.2 The advantages of the purposive sampling method .......... 34
3.5.2 Disadvantages of the purposive sampling method .......... 35
3.5.3 Criteria set for a responded to be included in the sample .. 35

3.6 DATA COLLECTION ............................................... 37
3.6.1 The research instrument ......................................... 37
3.6.2.1 The studying of records ................................... 38
3.6.2.2 Interview method ........................................... 38
3.6.2.3 Advantages of the interview method ...................... 39
3.6.2.4 Disadvantages of the interview method ................. 41
3.6.2.5 The interview method schedule ......................... 42

3.7 ANALYSIS OF THE DATA ........................................ 42

3.8 RELIABILITY AND VALIDITY OF THE RESEARCH ............. 43
3.8.1 Pretesting of the instrument .................................. 44
3.8.2 Reliability of the research instrument ...................... 44
3.8.3 Validity of the research instrument .......................... 44
3.8.4 Reliability and validity of the research ......................

3.9 ETHICAL CONSIDERATIONS OF THIS RESEARCH ............ 45

3.10 SUMMARY ........................................................ 49
CHAPTER 4

DATA ANALYSIS AND INTERPRETATION OF RESEARCH FINDINGS

4.1 INTRODUCTION ........................................................................ 55
4.2 OBJECTIVES OF THIS RESEARCH ............................................... 55
4.3 SAMPLING .............................................................................. 56
4.4 DISCUSSION OF THE RESEARCH FINDINGS .............................. 56
  4.4.1 Data from clinic records ......................................................
4.5 DISCUSSION OF THE FINDINGS ............................................... 56
  4.5.1 Biographical information of respondents .............................
  4.5.2 ..........................................................................
4.4.3 ..........................................................................
4.4.4 ..........................................................................
4.4.5 ..........................................................................
4.4.6 ..........................................................................
4.4.7 ..........................................................................
4.4.8 ..........................................................................
4.4.9 ..........................................................................
4.4.10 ..........................................................................
4.5 SUMMARY ............................................................................
CHAPTER 5

SUMMARY, CONCLUSIONS, RECOMMENDATIONS AND LIMITATIONS

5.1 INTRODUCTION .......................................................... 151

5.2 SUMMARY OF THE RESEARCH ....................................... 151
5.2.1 Background of the research and literature study .................. 151
5.2.2 Objectives of the research ......................................... 152
5.2.3 Research design and Method ...................................... 153
5.2.4 Analysis of the data ................................................ 154
5.2.4.1 Biographical data of respondents ............................ 154
5.2.4.2 Knowledge of TB ........................................... 155
5.2.4.3 Respondents as TB patient (previous infection) ............... 155
5.2.4.4 The current infection ...................................... 156
5.2.4.5 The stigmatisation of TB ................................... 156
5.2.4.6 Information about the treatment supporter ..................... 157
5.2.4.7 Comparison of previous and current infection ................. 157
5.2.4.8 The opinion of the respondents on the DOTS strategy ......... 158

5.4 CONCLUSION ............................................................. 158

5.5 RECOMMENDATION FOR THE IMPROVEMENT OF DOTS STRATEGY 161

5.6 RECOMMENDATION FOR FURTHER RESEARCH ................. 161

5.6 LIMITATION .............................................................. 162

5.7 SUMMARY ................................................................. 163

5.6 SUMMARY OF CHAPTER 5 ............................................. 167

BIBLIOGRAPHY ............................................................... 163

5.3 CONCLUSIONS .............................................................

5.4 RECOMMENDATIONS ...................................................
5.4.1 Recommendations for the improvements of the health services  
5.4.2 Recommendation for further research ................................

5.5 LIMITATIONS .............................................................
5.6 SUMMARY ..........................................................
6  BIBLIOGRAPHY ....................................................
ANNEXURE

Annexure A: A copy of the interview schedule
Annexure B: Letter requesting permission to do research in KZN
Annexure C: Letter or permission received from
Annexure D: Written consent
Annexure E: Copy of green card
Annexure F: Map of North Sound Central Health District
Annexure G: TB register
LIST OF TABLES

Table 1.1: ..............................................................
Table 2.2: ..............................................................
Table 4.1: Age categories of respondents .......................... 56
Table 4.2: Respondents’ type of work .............................. 59
Table 4.3: Patients’ knowledge of what Tb stand for .......... 60
Table 4.4: TB as an infectious disease ............................ 61
Table 4.5: Fatality of TB .......................................... 62
Table 4.6: Causes of TB ........................................... 62
Table 4.7: Respondents’ opinion on how to recognise a person with TB ..................................................... 63
Table 4.8: The most serious of listed conditions ................. 64
Table 4.9: The respondents’ understanding on how drug resistance develops ..................................................... 75
Table 4.10: Reasons for interrupting treatment .................. 76
Table 4.11: The extent to which HIV positive people can be successfully treated for TB ...................................... 77
Table 4.12: The respondents’ opinion on how TB is prevented .. 78
Table 4.13: Reasons why the respondents were not cured ...... 85
Table 4.14: Respondents’ frequency in consulting health professionals . . . 94
Table 4.15: Respondents’ frequency
Table 4.16: Reasons why respondents might default treatment before completion in current infection ....................... 99
Table 4.17: Medication taken by respondents .................... 99
Table 4.18: Side effects patients can expect when taking TB drugs ...... 102
Table 4.19: The frequency in which respondents are taking their medicine 103
Table 4.20: The knowledge of co-workers on patients’ TB status .......... 106
Table 4.21: Support from other people .............................................. 109
Table 4.22: Knowledge of the treatment supporter about the symptoms of TB 118
Table 4.23: When have you heard about the DOTS strategy the first time ................................................................. 125
Table 4.24: People from where the patient learned about the DOTS strategy 125
Table 4.25: Respondents’ knowledge about what DOTS strategy is ...... 126
Table 4.26: The respondents’ reasons why DOTS strategy should continue 128
LIST OF DIAGRAMS
