Chapter 1

Orientation to the research

1.1	INTRODUCTION	1
1.2	RESEARCH PROBLEM	3
1.2.1	Motivation for the study	3
1.2.2	Research questions	4
1.3	SCOPE AND LIMITATIONS OF THE STUDY	5
1.4	CONCEPTUAL FRAMEWORK	5
1.4.1	Components of the Health Belief Model (HBM)	6
1.4.1.1	Individual perceptions	6
1.4.1.2	Modifying factors	6
1.4.1.3	Variables affecting the likelihood of initiating action	7
1.4.2	Application of the HBM to the investigation into adolescent mothers' failure to use contraceptives Effectively	8
1.5	SIGNIFICANCE OF THE STUDY	8
1.6	PURPOSE AND OBJECTIVES OF THE STUDY	9
1.6.1	Research objectives	9
1.7	ASSUMPTIONS	9
1.8	ETHICAL CONSIDERATIONS	10
1.8.1	Rights of the respondents	10
1.8.2	Rights of the institution where the study is conducted	10
1.8.3	Scientific honesty on the part of the researcher	11
1.9	DEFINITIONS OF TERMS	11
1.10	ABBREVIATIONS USED	13
1.11	OUTLINE OF THE STUDY	14
1.12	CONCLUSION	15

Table of contents**Page**

Chapter 2**Literature review**

2.1	INTRODUCTION	16
2.2	COMPONENTS OF THE HEALTH BELIEF MODEL (HBM)	17
2.2.1	Individual perceptions of adolescent mothers that could influence the non-utilisation of contraceptives	17
2.2.2	Modifying factors that could influence adolescent mothers' non-utilisation of contraceptives	19
2.2.2.1	Age	19
2.2.2.2	Race	19
2.2.2.3	Gender	20
2.2.2.4	Educational status	20
2.2.2.5	Social psychological issues	21
2.2.2.6	Cultural/traditional factors	22
2.2.2.7	Economic factors	23
2.2.2.8	Structural variables	24
2.2.2.8.1	Modern contraceptives	25
2.2.2.8.2	Traditional contraceptives	30
2.3	VARIABLES AFFECTING ADOLESCENT MOTHERS' LIKELIHOOD OF INITIATING AND MAINTAINING ACTIONS TO USE CONTRACEPTIVES	32
2.3.1	Perceived benefits of contraceptive utilisation	33
2.3.2	Perceived barriers to the utilisation of contraceptives	33
2.3.2.1	Staff attitudes	33
2.3.2.2	Accessibility and affordability of contraceptives	34
2.4	CONCLUSION	34

Chapter 3**Research methodology**

3.1	INTRODUCTION	36
-----	--------------------	----

Table of contents	Page
3.2 RESEARCH DESIGN	36
3.2.1 Quantitative research	36
3.2.1.1 Characteristics of quantitative research	37
3.2.2 Exploratory descriptive design	37
3.2.2.1 Characteristics of explorative-descriptive design	38
3.3 RESEARCH SETTING	39
3.4 RESEARCH POPULATION AND SAMPLE	39
3.4.1 Population	39
3.4.2 Sample	39
3.4.2.1 Characteristics of non-probability sampling	40
3.5 DATA COLLECTION	40
3.5.1 Data collection instrument	41
3.5.1.1 Characteristics of a questionnaire	41
3.5.1.2 Development of the questionnaire	41
3.5.1.3 Structure of the questionnaire	42
3.5.2 Reliability of the research instrument	43
3.5.3 Validity of the research instrument	43
3.5.3.1 External validity	43
3.5.3.2 Internal validity	44
3.6 ETHICAL CONSIDERATIONS	44
3.6.1 Permission to conduct the study	44
3.6.2 Principles of research ethics	44
3.6.2.1 Principle of beneficence	45
3.6.2.2 Principle of respect for human dignity	45
3.7 CONCLUSION	46

Chapter 4

Analysis and presentation of data

	Page
4.1 INTRODUCTION	47
4.2 PERSONAL (BIOGRAPHIC) DATA	48
4.2.1 Respondents' ages	48
4.2.2 Race	49
4.2.3 Home language	49
4.2.4 Highest school qualification	50
4.2.5 Household income	50
4.2.6 Summary of personal data	51
4.3 SEX EDUCATION	51
4.3.1 Age at first sexual encounter	51
4.3.2 Reasons for sex for the first time	53
4.3.3 Number of children the respondents had	54
4.3.4 Age at birth of first child	54
4.3.5 Age at which sex education was provided	56
4.3.6 Sources providing sex education	58
4.3.7 Ways in which sex education was presented	59
4.3.8 Summary of sex education	59
4.4 KNOWLEDGE OF CONTRACEPTIVES	60
4.4.1 Clinic visits for contraceptives	60
4.4.2 Utilisation of contraceptives	61
4.4.3 Contraceptives used	61
4.4.4 Choice of contraceptive methods at clinics	62
4.4.5 Utilisation of traditional contraceptives	63
4.4.6 Problems with receiving contraceptives or information	64
4.4.7 Knowledge about contraceptives before pregnancy	65
4.4.8 Contraceptive use before pregnancy	66
4.4.9 Side effects of contraceptives	67
4.4.10 Reasons for discontinuing contraceptive use	68
4.4.11 Contraceptive use after babies' births	68
4.4.12 Knowledge about side effects of contraceptives	70
4.4.13 Sources of information about side effects	71
4.4.14 Availability of contraceptives	72
4.4.15 Advice received at clinics	72
4.4.16 Distance from home to the nearest clinic	73
4.4.17 Type of clinic visited by respondents	74
4.4.18 Clinic operating days	74
4.4.19 Clinic operating times	75
4.4.20 Clinic staff's attitudes towards adolescent clients	76

Table of contents	Page
4.4.21 Beliefs about contraceptives	78
4.4.22 Summary of contraceptive knowledge	78
4.5 TERMINATION OF PREGNANCY SERVICES (TOPs)	78
4.5.1 Termination of pregnancies (TOPs)	79
4.5.2 Knowledge about termination of pregnancy services (TOPs)	79
4.5.3 Utilisation of termination of pregnancy services (TOPs)	80
4.5.4 Reasons for abortions/TOPs	80
4.5.5 Willingness to use TOPs	81
4.5.6 Comments or problems	81
4.5.7 Summary of TOPs	82
4.6 FINDINGS IN TERMS OF THE HEALTH BELIEF MODEL (HBM)	82
4.6.1 Individual perceptions	82
4.6.2 Modifying factors	83
4.6.3 Variables affecting the initiation of actions	83
4.7 CONCLUSION	83
Chapter 5	
Conclusions, limitations and recommendations	
5.1 INTRODUCTION	84
5.2 CONCLUSIONS	84
5.2.1 Conclusions in relation to the objectives guiding the study	84
5.2.2 Conclusions in terms of the Health Belief Model (HBM)	87
5.2.3 Assumptions underlying the study in relation to the conclusions	88
5.3 LIMITATIONS	88
5.4 RECOMMENDATIONS	89
5.4.1 Recommendations for addressing adolescent mothers' non-utilisation of contraceptives	89
5.4.2 Recommendations for future research	91
5.5 CONCLUDING REMARKS	92
BIBLIOGRAPHY	93
