Introducing Unisa Data Repository: Figshare

Mr Makaba Macanda
Data Repository

https://unisa.figshare.com/

- Live July 2019
- Single sign on
- CAS (Central authentication system)
- Figshare for institutions instance
- Specific for Unisa, researchers, staff and students
- Structured per Colleges, Schools and Departments
figshare is a repository where users can make all of their research outputs available in a citable, shareable and discoverable manner.

figshare allows users to upload any file format to be previewed in the browser so that.

Credit for research

Get credit for all your research

Make your data available in a simple FAIR repository
Simple and FAIR

Unisa Data Repository made as simple as possible to make:
Findable, Accessible, Interoperable and Reusable (FAIR)
Simple and FAIR

- Publish research in any file format and assign an institutionally-branded DOI
- Document with customizable, discipline-specific metadata
- Discoverable content across major search engines and academic frameworks
Managing your research

• Upload files via the web interface or via the API
• Easily add relevant metadata and store it safely for your own reference
• or share it publicly or with privately with colleagues
• All your research available in one place, securely stored on the cloud
Collaborate

• Create public or private collaborative spaces
• Choose the people you'd like to collaborate with
• Share data, notes, and add feedback
Discover & Community

• Follow the research that interests you and be notified when something new is published
• Find collections curated by other Figshare authors
• See what your peers are up to and connect for more meaningful discoveries and collaboration
Reporting and statistics (Admin)

• Public statistics on all views, downloads, citations, and other altmetrics of Unisa outputs
• Private reporting dashboards on content usage and user reports
• Report on file types, storage usage, and more
