MASTER OF ARTS IN SOCIAL SCIENCE (MENTAL HEALTH)

at the

UNIVERSITY OF SOUTH AFRICA

SUPERVISOR: MS H D GROBLER

JUNE 2005
ACKNOWLEDGEMENTS

I wish to express my gratitude to Hanka Grobler for her excellent support and superb guidance.

I also wish to thank God, my husband, Andre and my daughters Mandri and Ankia for their wonderful support.
SUMMARY

The aim of this study is to demonstrate how the complementary concepts of stability and change could manifest during the therapeutic process, specifically with clients showing the symptom of dependency.

The study is guided by a literature study on systems/cybernetic theory with a focus on the cybernetic complementarity of stability and change. A brief description is provided of the symptom of dependency from a more traditional lineal perspective as well as a non-lineal (systemic) perspective.

A single case study is utilized to describe how both stability and change could manifest in the therapeutic process. From this description the relevance and usefulness of addressing both stability and change during the therapeutic process emerge and are outlined.

KEY TERMS

Stability and change, systems/cybernetics, context, wholeness, process, interaction, relationships, substance dependency.
## CONTENTS

### CHAPTER 1: INTRODUCTION

1.1 Introduction  
1.2 Aim of the study  
1.3 Objectives of the research  
1.4 Research design  
1.4.1 Case study  
1.4.2 Unit of analysis, data collection and data presentation  
1.5 Limitations of the research  
1.6 Presentation of content of the study

### CHAPTER 2: SYSTEMIC/CYBERNETIC EPISTEMOLOGY

2.1 Introduction  
2.2 The fundamental assumptions of systems theory/cybernetics  
2.2.1 Circularity and recursiveness  
2.2.2 Feedback  
2.2.3 Context  
2.2.4 Wholeness and nonsummativety  
2.2.5 Rules and boundaries  
2.2.6 Equifinality  
2.3 Cybernetic complementarities  
2.4 Cybernetics of cybernetics (second order cybernetics)  
2.5 A lineal (linear) and non-lineal (non-linear/systemic) description of substance dependency  
2.5.1 A lineal description of dependency  
2.5.1.1 Chemical substances  
2.5.1.2 Substance abuse  
2.5.1.3 Substance dependency  
2.5.2 A non-lineal (systemic) description of the symptom of dependency  
2.6 Summary
5.2 The usefulness and relevance of stability and change as a cybernetic complementarity 58
5.3 Recommendations  61
