

FRICAN STUDIES

19th September, 1957.

Senator Dr. the Hon. L.I. Rubin,  
P.O. Box 3584,  
CAPE TOWN.

Dear Senator,

Thank you for your letter of the 16th instant. It found me trying to get my bearings at Fort Hare after my prolonged absence from duty. It will take a little while for one to get the Drill Hall out of one's system.

Kimberley. I have noted your remarks about Kimberley and I must say that I agree that it is necessary to consolidate existing branches and put them on a sound foundation before launching out into new fields. It is very gratifying to learn about the progress which is being made in various centres.

East London. I did hear about Godlo's illness when I was still in Johannesburg. I am glad to hear that suitable arrangements have been made for the carrying on of the work. I do not know yet, when I shall get the opportunity to run down to East London, but when I do I shall certainly look up Miss Z. Hattingh.

Directors' Meeting. I was relieved to learn that the Directors' meeting had been postponed because I did not think it would have been right to get away from here so soon after my return to duty. I must put in as much time as possible with my students before they write their examinations in November. Early December will suit me much better.

Deposit Receiving Institution. I am sending you a brief statement embodying the points raised in your letter. I think it can suitably be added at the end of the statement already in your hands. Further details can be added later when the project begins to take definite shape.

With kind regards,

Yours sincerely,

Enclos.
