

TABLE OF CONTENTS

Chapter 1: Background and context	1
1.1 Introduction	1
1.2 The importance of mathematics	2
1.2.1 The importance of mathematics in general	2
1.2.2 The importance of mathematics in South Africa	3
1.3 Access to mathematics	4
1.3.1 The meaning of access	4
1.3.2 Access to mathematics: an international perspective	4
1.3.3 Access to mathematics in South Africa	5
<i>Political factors affecting participation in mathematics</i>	6
<i>The impact of the political background on socio-economic factors</i>	7
<i>The impact of the political background on schooling and assessment</i>	8
<i>The impact of the political background on teaching and learning</i>	9
<i>The impact the political background on mathematics</i>	11
1.4 Tertiary education's response	16
1.4.1 The international situation	16
1.4.2 The South African situation	17
<i>Redress</i>	17
<i>Massification</i>	18
1.5 South African access initiatives	19
1.6 Distance learning	24
1.6.1 Open and distance learning	24
<i>Opportunities and constraints of distance learning</i>	25
<i>Differences in provision of distance education in the developed and developing world</i>	27
1.6.2 The nature of UNISA	28
1.6.3 UNISA's role in providing access to mathematics	30
1.7 Similarities and differences between the different approaches to access	33
1.8 Summary	34
1.9 Overview of the thesis	34

Chapter 2: Literature Review	37
2.1 Introduction	37
2.2 Research in mathematics education	38
2.3 Learning mathematics	39
2.3.1 Factors relevant to learning mathematics	39
2.3.2 Factors influencing effective study of mathematics at tertiary level	39
<i>Students' backgrounds</i>	40
<i>Teaching approach</i>	41
<i>Learning styles</i>	42
<i>Linguistic and contextual aspects of mathematics discourse</i>	43
<i>Affective factors</i>	44
<i>Meta-cognitive skills</i>	45
<i>Assessment principles</i>	45
<i>Linking learning and assessment</i>	45
<i>Types of assessment</i>	45
<i>Practical considerations of assessment tasks</i>	52
2.3.3 Factors influencing the study of tertiary-level mathematics in South Africa	52
<i>Students' backgrounds</i>	52
<i>Teaching approach and learning style</i>	53
<i>Linguistic and contextual aspects of mathematics discourse</i>	55
<i>Affective factors</i>	58
<i>Meta-cognitive skills</i>	59
<i>Assessment</i>	59
2.3.4 Additional factors involved in studying mathematics at a distance	60
<i>Media</i>	60
<i>Interactivity</i>	61
<i>Contact and support</i>	61
<i>Time management</i>	62
<i>Adequate infrastructure</i>	62
<i>Teaching approach and learning style</i>	63
<i>Feedback and assessment</i>	63
<i>English as the language of instruction</i>	64

2.4	Theoretical considerations in the design of access programmes	65
2.4.1	The UCT Science Foundation Programme (SFP)	65
2.4.2	The Science Foundation Programme at the University of Natal (Pietermaritzburg)	65
2.4.3	The College of Science at the University of the Witwatersrand (Wits)	66
2.5	Placement assessment	66
2.5.1	International practice	67
2.5.2	Placement testing in South Africa	68
2.5.3	What should be tested?	69
	<i>Quantitative literacy</i>	69
	<i>Academic literacy</i>	70
	<i>The need to read in order to learn mathematics</i>	70
2.5.4	Specific examples of admissions or placement testing	71
	<i>Alternative Admissions Research Project (AARP) (University of Cape Town (UCT))</i>	72
	<i>The testing aspect of the 'Teach-Test-Teach' Programme at the University of Natal (Durban)</i>	74
2.6	Summary	74
	Chapter 3: Research design	75
3.1	A two-phase process	75
3.1.1	Pre-research phase	75
3.1.2	Access to mathematics in an action research framework	75
3.2	Description of action research	75
3.3	Research method used	79
3.4	Factors affecting the study	83
3.4.1	Language of instruction	83
3.4.2	The meaning of success	84
3.4.3	The role of selection and placement	84
3.4.4	Limited availability of meaningful data	85
3.4.5	Institutional factors	87
3.5	Summary	87
	Chapter 4: Creation of a Mathematics Access Module: study material, assessment and initial support options	89
4.1	Introduction	89

4.1.1	Use of the term ‘access’	89
4.1.2	Access examination as the first step	93
4.1.3	The need for study material	93
4.2	Factors to be considered before writing study material	94
4.2.1	Purpose of the module	94
4.2.2	Statutory requirements	94
4.2.3	Characteristics of the target student population	94
4.3	Issues in setting up the curriculum	95
	<i>Social and personal aspects</i>	96
	<i>Mathematical aspects</i>	96
4.4	Development of the study guides	99
4.4.1	Starting point	99
4.4.2	Philosophical approach	100
	<i>Emphasis on understanding</i>	100
	<i>‘Reform’ vs. ‘traditional’ approach</i>	101
	<i>Individual construction of knowledge</i>	102
	<i>Interactive approach</i>	102
	<i>The trade-off</i>	102
4.4.3	Pedagogical approach	104
	<i>Student diversity</i>	104
	<i>Surface and deep learning</i>	104
	<i>Scaffolding</i>	104
4.4.4	The end result	106
	<i>Problem solving</i>	108
	<i>Organisation of text</i>	110
	<i>The trade-off</i>	112
4.5	Assessment and support	113
4.5.1	Assessment	113
4.5.2	Provision of support	114
	<i>Contact with lecturers</i>	114
	<i>Contact with tutors</i>	114
4.6	Results	116
4.7	Summary	117

Chapter 5: Reading skill and learning mathematics	118
5.1 Introduction	118
5.2 Language and meaning	119
5.3 Mathematics discourse and reading	122
5.4 Reading comprehension: theoretical background	123
5.4.1 Anaphoric resolution	124
5.4.2 Logical relations	125
<i>Causal and conditional causal relations</i>	125
<i>Contrastive relations</i>	126
5.4.3 Sequencing	127
5.4.4 Visually presented information	127
5.4.5 Vocabulary	128
5.5 Methodology	129
5.5.1 Creation of reading test (Phase I)	129
5.5.2 The face-to-face intervention programme (Phase II)	129
<i>Purpose</i>	129
<i>Initial testing</i>	130
<i>Interviews</i>	132
<i>The components of the programme</i>	132
<i>Extensive reading activities</i>	132
<i>Intensive reading activities</i>	133
<i>Reading mathematics</i>	133
<i>Macro and microstructure of text</i>	134
<i>Vocabulary</i>	134
<i>Logical relations</i>	134
<i>Anaphoric references</i>	135
<i>Interpreting and using tables and graphs</i>	135
<i>Final testing</i>	136
<i>Information summary</i>	136
5.6 Results (Phase I)	136
5.6.1 Relationship between overall reading scores and examination performance	136
5.6.2 Relationship between specific components of the reading test and examination performance	138

5.7	Results (Phase II)	140
5.7.1	Student characteristics and perceptions	140
5.7.2	Reading pre-and posttest results	142
5.7.3	Programme evaluation results	146
5.8	Discussion	146
5.9	Summary	150
 Chapter 6: A large-scale reading intervention programme		151
6.1	Introduction	151
6.2	Choice of intervention medium for Phase III	152
6.2.1	Reasons for using video as an educational medium	152
6.2.2	Some limitations relating to the use of video in the UNISA context	154
	<i>Production constraints</i>	154
	<i>Student use of video</i>	154
	<i>Lack of facilitation</i>	155
6.3	Methodology for Phase III	155
6.3.1	Acquiring background information	156
6.3.2	Producing video material	156
	<i>Structure of the video</i>	157
	<i>Modifications made for Video 2</i>	158
	<i>The video workbook</i>	158
6.3.3	Related reading activities	159
6.4	Evaluations undertaken in the third and fourth research cycles	159
6.4.1	Evaluating Video 1 and Video 2	160
6.4.2	Evaluating reading	160
	<i>Investigation of reading skills in 2002</i>	161
	<i>Investigation of reading skills in 2003</i>	162
6.5	Results of the evaluations	163
6.5.1	Video 1	163
6.5.2	Video 2	166
6.5.3	Results of the reading evaluations, 2002	167
	<i>Reading speed and comprehension</i>	167
	<i>Assignment activities</i>	168
6.5.4	Results of the reading evaluations, 2003	169

<i>Reading speed and comprehension</i>	169
<i>Biographical information</i>	169
<i>Assignment activities</i>	173
<i>Analysis of results</i>	173
6.5.5 Reading mathematical symbols	175
6.6 The impact of the video on mathematics performance	179
6.6.1 Methods used to compare results in 2001 (without video) and 2002 (with video)	179
6.6.2 Comparability of 2001 and 2002 students	180
6.7 Discussion of the results	181
6.7.1 Video	181
6.7.2 Additional reading activities	182
6.8 Conclusion	184
6.8.1 Potential use of video	184
6.8.2 Pre-registration diagnostic assessment of reading skills	184
6.9 Summary	185
Chapter 7: An alternative approach to assessment for the Mathematics	
Access Module	186
7.1 The second set of action research cycles	186
7.2 Assessment policy at UNISA	187
7.2.1 Types of assessment at UNISA	187
7.2.2 UNISA assessment guidelines	188
7.3 Rationale for the introduction of an alternative form of assessment	189
7.4 Methodology for this intervention	193
7.4.1 Design of the project	193
7.4.2 Marking criteria	195
7.4.3 Aspects of student performance investigated	196
7.4.4 Overview of project	197
7.5 Results obtained	198
7.5.1 The 2001 results	198
<i>Comments regarding Task A</i>	199
<i>Comments regarding Task B</i>	200
<i>Correlation of the examination marks with Task A</i>	201

<i>Problems that arose</i>	201
<i>Possible reasons for the problems experienced by the students</i>	202
<i>Modifications made after the first action research cycle</i>	202
7.5.2 The 2002 results	203
<i>Comments regarding Task A</i>	203
<i>Comments regarding Task B</i>	203
<i>Correlation of the examination mark against Task A and Task B</i>	204
<i>Problems that arose</i>	205
<i>Possible reasons for the problems experienced by the students</i>	206
<i>Modifications made after the second action research cycle</i>	206
7.5.3 The 2003 results	207
7.5.4 Results in general	208
7.6 Additional findings	209
7.6.1 Reading/language problems	209
7.6.2 Number sense	211
7.6.3 Meta-cognitive problems	211
7.6.4 General knowledge problems	212
7.7 Discussion of the results	216
7.8 Summary	218
Chapter 8: Assessment and support	219
8.1 Introduction	219
8.2 Assessment	219
8.2.1 Assignments	221
<i>Streamlining the marking of assignments</i>	223
8.2.2 Assignments and the credit system	223
8.2.3 Examinations	226
<i>Supplementary examinations</i>	226
<i>Format of questions</i>	227
<i>The use of past examination papers</i>	227
<i>Inclusion of year mark component</i>	227
8.3 Provision of support	229
8.3.1 Contact with lecturers	229
8.3.2 Contact with tutors	230

8.3.3	Peer support	231
8.4	Impact of study material and assessment activities	232
8.4.1	Impact of study material	233
8.4.2	Impact of changes in assessment	234
8.5	Discussion of results	236
8.6	Summary	236
Chapter 9: Establishing a process of diagnostic assessment		238
9.1	The final intervention and action research cycle	238
9.2	Rationale for the introduction of diagnostic assessment at UNISA	239
9.3	Acceptance of diagnostic assessment for the Mathematics Access Module	241
9.4	Investigating various options	242
9.4.1	Testing at the University of Cape Town	242
	<i>The Alternative Admissions Research Project (AARP)</i>	242
	<i>A trial of the AARP tests at UNISA</i>	242
9.4.2	Testing for placement at the University of Port Elizabeth	245
	<i>Background to placement testing at UPE</i>	245
	<i>Success of ACCUPLACER at UPE</i>	246
9.5	Practical aspects of introducing diagnostic assessment at UNISA	247
9.5.1	Investigating the assessment process	247
9.5.2	Assessment format	248
9.5.3	Costs of the assessment	248
9.6	Choice of assessment tools	248
9.6.1	Selection of the ACCUPLACER Reading Comprehension	249
9.6.2	The development of a test for quantitative reasoning	250
9.6.3	Administering the assessment	252
	Description of the assessment components	253
9.7.1	ACCUPLACER Reading Comprehension (ARC)	253
9.7.2	Basic Arithmetic Test (BAT)	254
9.8	Grading criteria	255
9.8.1	Criteria for the ARC	256
9.8.2	Criteria for the BAT	257
9.8.3	Categorisation	259
9.9	Results of the assessment	259

9.9.1	Practical aspects	259
9.9.2	ARC results	260
9.9.3	BAT results	262
9.9.4	Consolidation of results	263
9.10	Discussion of results	265
9.11	Diagnostic assessment as part of an identification-action cycle	268
9.11.1	Category 51	268
9.11.2	Category 52	269
9.11.3	Category 53	270
9.12	Conclusion	270
9.13	Summary	270
Chapter 10: From access to success?		272
10.1	The end of the research cycle	272
10.1.1	Content and context	272
10.1.2	Overview	273
10.2	Review of Chapters 1 to 9	273
10.2.1	Chapter 1: Background and context	273
10.2.2	Chapter 2: Literature review	274
10.2.3	Chapter 3: Research design	275
10.2.4	Chapter 4: Creation of study material and initial support options	276
10.2.5	Chapter 5: Reading skill and learning mathematics	277
10.2.6	Chapter 6: A large-scale reading intervention programme	278
10.2.7	Chapter 7: An alternative approach to assessment	280
10.2.8	Chapter 8: Assessment and support	280
10.2.9	Chapter 9: Establishing a process of diagnostic assessment	282
10.3	Some reflections	284
10.3.1	The design and evolution of the Mathematics Access Module	284
10.3.2	The reading intervention	290
10.3.3	Alternative assessment	292
10.3.4	Diagnostic assessment	296
10.4	Limitations of the research	299
10.4.1	Parallel interventions	299
10.4.2	Time demands	299

10.4.3	Repeat students	300
10.4.4	Understanding the rationale for access to mathematics	300
10.4.5	The changing South African Higher Education landscape	300
10.4.6	Uncontrolled growth	301
10.5	Directions for future research	301
10.5.1	Longitudinal research	302
10.5.2	Formative assessment	302
10.5.3	Academic support	302
10.6	Conclusion	303
	References	305
