

A Ranked Tree for a South African Military Strategy

The ranked tree, M , for a South African Military Strategy is depicted on the following pages. The tree was developed in the Expert Choice 2000 Professional 10.1, Build 903.05 software package which is licenced to the author. The tree is a left-to-right representation of M . The vertices are thus displayed in a top-to-bottom manner. The vertices are not labelled and their associated $v_{\langle\phi\rangle}$ is indicated in brackets as (L: $v_{\langle\phi\rangle}$).
