Acknowledgements

I would like to thank the following for their contribution to the production of this dissertation:

- Dr Maseko J S, my supervisor for his dependable academic support and advice throughout the research project. His professional guidance encouraged me all the way.
- My wife, Lerato, for her unwavering support through the long dark hours of the study and for her resolute commitment to handling the technical aspect of the document.
- My sons Blu-Shonaphi and Sly for their time and motivation.
- My parents Repson and Bettie for all their prayers during the long months of perspiration.
- My late brother Thomas for his educational inspiration.
- My friend Anthony Isabrye, for being a partner and a beacon of hope when none was in sight.
- Mr D J Mthetwa, the principal of Orhovelani High School, and his staff for their support when I needed it most.
- All the school principals who allowed me to conduct research in their schools, and the teachers who gave me permission to interview them.
- God the Almighty for giving me strength to persevere through thick and thin.

SUMMARY

Site-based management (SBM) is recent restructuring initiative in schools. The study is carried out with the aim of investigating the extent to which teachers participate in site-based management in schools. The researcher assumes that teachers are sidelined in site-based management in schools. An extensive literature review provides a theoretical foundation of the study and exposes the nature of site-based management. The qualitative approach is used in the case study. Data are collected through interviews that were conducted between July and September 2004. The interpretive paradigm is used in data collection, analysis and interpretation.

The collected data are analysed through inductive analysis. The major research finding is that teachers are marginalised in site-based management in schools and that school-based decision making is still largely in the hands of school principals. It is recommended that principals and SMT's improve their management and leadership styles in order to allow for real participation of teachers in decision-making to take place.

Key words:

Teacher participation

Site-based management

Site-based decision making

School-based management

Decentralisation of decision making powers

Marginalisation of teachers

Teacher isolation

Case study

Collaborative governance
