## ACKNOWLEDGEMENTS

Dedicated to my husband, David (Dr. David Depew), whose inspiration and encouragement have been a tremendous help in the writing of this dissertation.

The author is also grateful for the fact that her love of Biblical Archaeology is what led her to meeting her husband, who was President of the Los Angeles Chapter of the Biblical Archaeology Society. This union has brought many years and hours of sharing in studies, research, and teaching together in Biblical Studies.

The author wishes to express her appreciation to Professor C. L. van Wyk Scheepers, her promoter, for his patience, knowledge and help.

Special recognition is to be given to a beloved professor, the late Dr. Butrus Abd-al-Malik, whose teaching in the areas of Biblical studies was a great inspiration in my life.
